## PRODUCT INFOS FOR SOLID FUEL

### Features

Depending upon the initial temperature and what tin is used, one 14 g tablet will bring to the boil 500 ml of water in approx. 7 minutes.

- Non-explosive
- Ignites with match or lighter
- No sparks
- Strong heating output
- Leaves almost no ash after burning
- No visible smoke
- Lightweight and compact
- When properly stored, Esbit solid fuel maintains its full functionality for many years
- Safety and Handling: Material Safety Data Sheet (MSDS) is available on request
- Works also at temperatures clearly below 0°C and in high altitudes
- No cartridges to dispose
- Easy to handle and simple technique which cannot fail
- Also highly efficient for starting campfires and BBQ-grills

### R & D

Research and constant innovation ensure that Esbit Compagnie and Gummi-Noller (manufacturer) continue to offer new solid fuel products world-wide. Knowledge and experience make it possible to provide our clients with market insight, technical expertise and product development know-how. We have developed our knowledge in the field of solid fuel tablets/cooking systems for now more than 75 years. Practical solutions help to improve existing products, or create completely new ones, with great efficiency and cost effectiveness. Take advantage of the expertise of one of the world's leading solid fuel specialists.
